

Project funding from VINNOVA available during 2020

VINNOVA supports the start-up of Testa Center by providing funding for projects aimed for verification purposes of commercially interesting and well-motivated projects that will use the center.

Funding shall be used to cover costs associated with the proposed center project, i.e. center fee, cost for personnel, consumables, chemicals or other materials, consultants, etc.

- **Maximum funding per project:** 300 000 SEK
- **Required co-funding:** 50% (for all entities, including universities)
- **Who can apply?** The opening is available for academic researchers, SME and large companies
- **How to apply?** Proposals are welcome and will be evaluated on a continual basis. Please contact helena.stroberg@uppsalabio.com or kristin.hellman@uppsalabio.com

This opening comprises general bioprocess up-scaling and/or verification projects, or bioprocess technologies, culture reagents and systems, media, software, algorithms and other products or methods with the potential to significantly improve manufacturing of biopharmaceuticals or other biological products.

The funding comes from the Swedish innovation agency Vinnova.
